

COAD[®] 40 Magnesium Stearate

DESCRIPTION

COAD[®] 40 Magnesium Stearate is a high grade magnesium stearate with a low soluble salt level that reduces discoloration during processing. The low dusting particle size improves handling, blending, and dispersion.

TYPICAL PROPERTIES

Total Ash, %	8.0
Moisture, %	4.0
Free Fatty Acid, %	3.0
Soluble Salts, %	Nil
Apparent Density, lbs/ft ³	24
% Thru 20 Mesh	90
Appearance	Free flowing white powder

APPLICATIONS

- **Paints, Varnishes, and Lacquers:** COAD[®] 40 Magnesium Stearate is recommended as a flattening agent for paints, varnishes, and lacquers. It is particularly suitable for products subject to high temperature since it is comparatively insoluble in most paint vehicles even at high temperatures.
- **Dry Lubricant:** It is an excellent dusting agent to prevent surface adhesion in ABS plastics and other thermoplastics with minimal discoloration.

ADDITIONAL INFORMATION

- Other – See SDS for COAD® 40 Magnesium Stearate for additional health, safety, and environmental information.
- Packaging – COAD® and MATHE Magnesium Stearates are packaged in various sized multiwall bags and supersacks, unitized on non-returnable wooden pallets. Please contact your Norac sales representative to discuss your special packaging requirements.
